DoubleT®: Le gazon synthétique avec des racines

DoubleT®: The synthetic grass with roots

DOUBLET® est le système innovant double fibre de **Italgreen**, caractérisé par 2 fibres tuffées à deux hauteurs différentes, la 1^{ère} à 40 mm, la 2^{de} à 60 mm.

Ce qui en fait un revêtement unique et incomparable.

DoubleT™ (International Patent Pending) is the innovative patented double-carpet characterized by the combination of two different yarns tufted at two heights. An advanced system breaking new ground in the world of synthetic carpets. This solution enables the manufacturing of two carpets at the same time and by just one tufting with two cuts to create an unparalleled turf. Nothing can be compared to: DoubleT™ age has just begun

T[®]

DOUBLE[®]

Deux mesures pour jouer toujours à haut niveau

Two sizes for a high level playing

Dans le gazon **DOUBLE T®**, la fibre courte et vigoureuse supporte la fibre longue bicolore monofilament.

In DoubleT® the short yarn, fibrillated and sturdy, supports the innovative and extra soft long yarn made of green bicoloured monofilament

CHARACTERISTICS

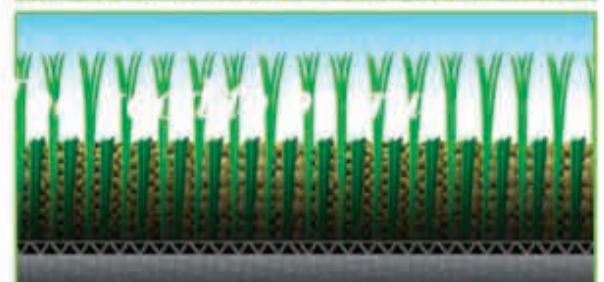

TECHNICAL SPECIFICATION

La plus petite fibre prévient l'arrachage et l'écrasement du brin lors de l'absorption des chocs, travaillant comme un "lien élastique".

The fibrillated yarn, short and netlike holds the infill in a perfect way, prevents its escape and increases the carpet's shock absorbency, working like an elastic layer.

Le long monofilament assure la glisse et donne à la touche de jeu la qualité de **XTENDER®**.

The long and extraordinary soft monofilament yarn ensures a smooth and fine to the touch playing surface... XTender® quality!

Le remplissage est ainsi beaucoup plus facile et plus rapide grâce à la structure de **DOUBLE T®** qui permet une réduction radicale de matériaux de remplissage.

The infill placement is much easier and faster thanks to the DoubleT® structure that allows a drastic reduction in the use of infill materials.

Double turf, une technologie unique

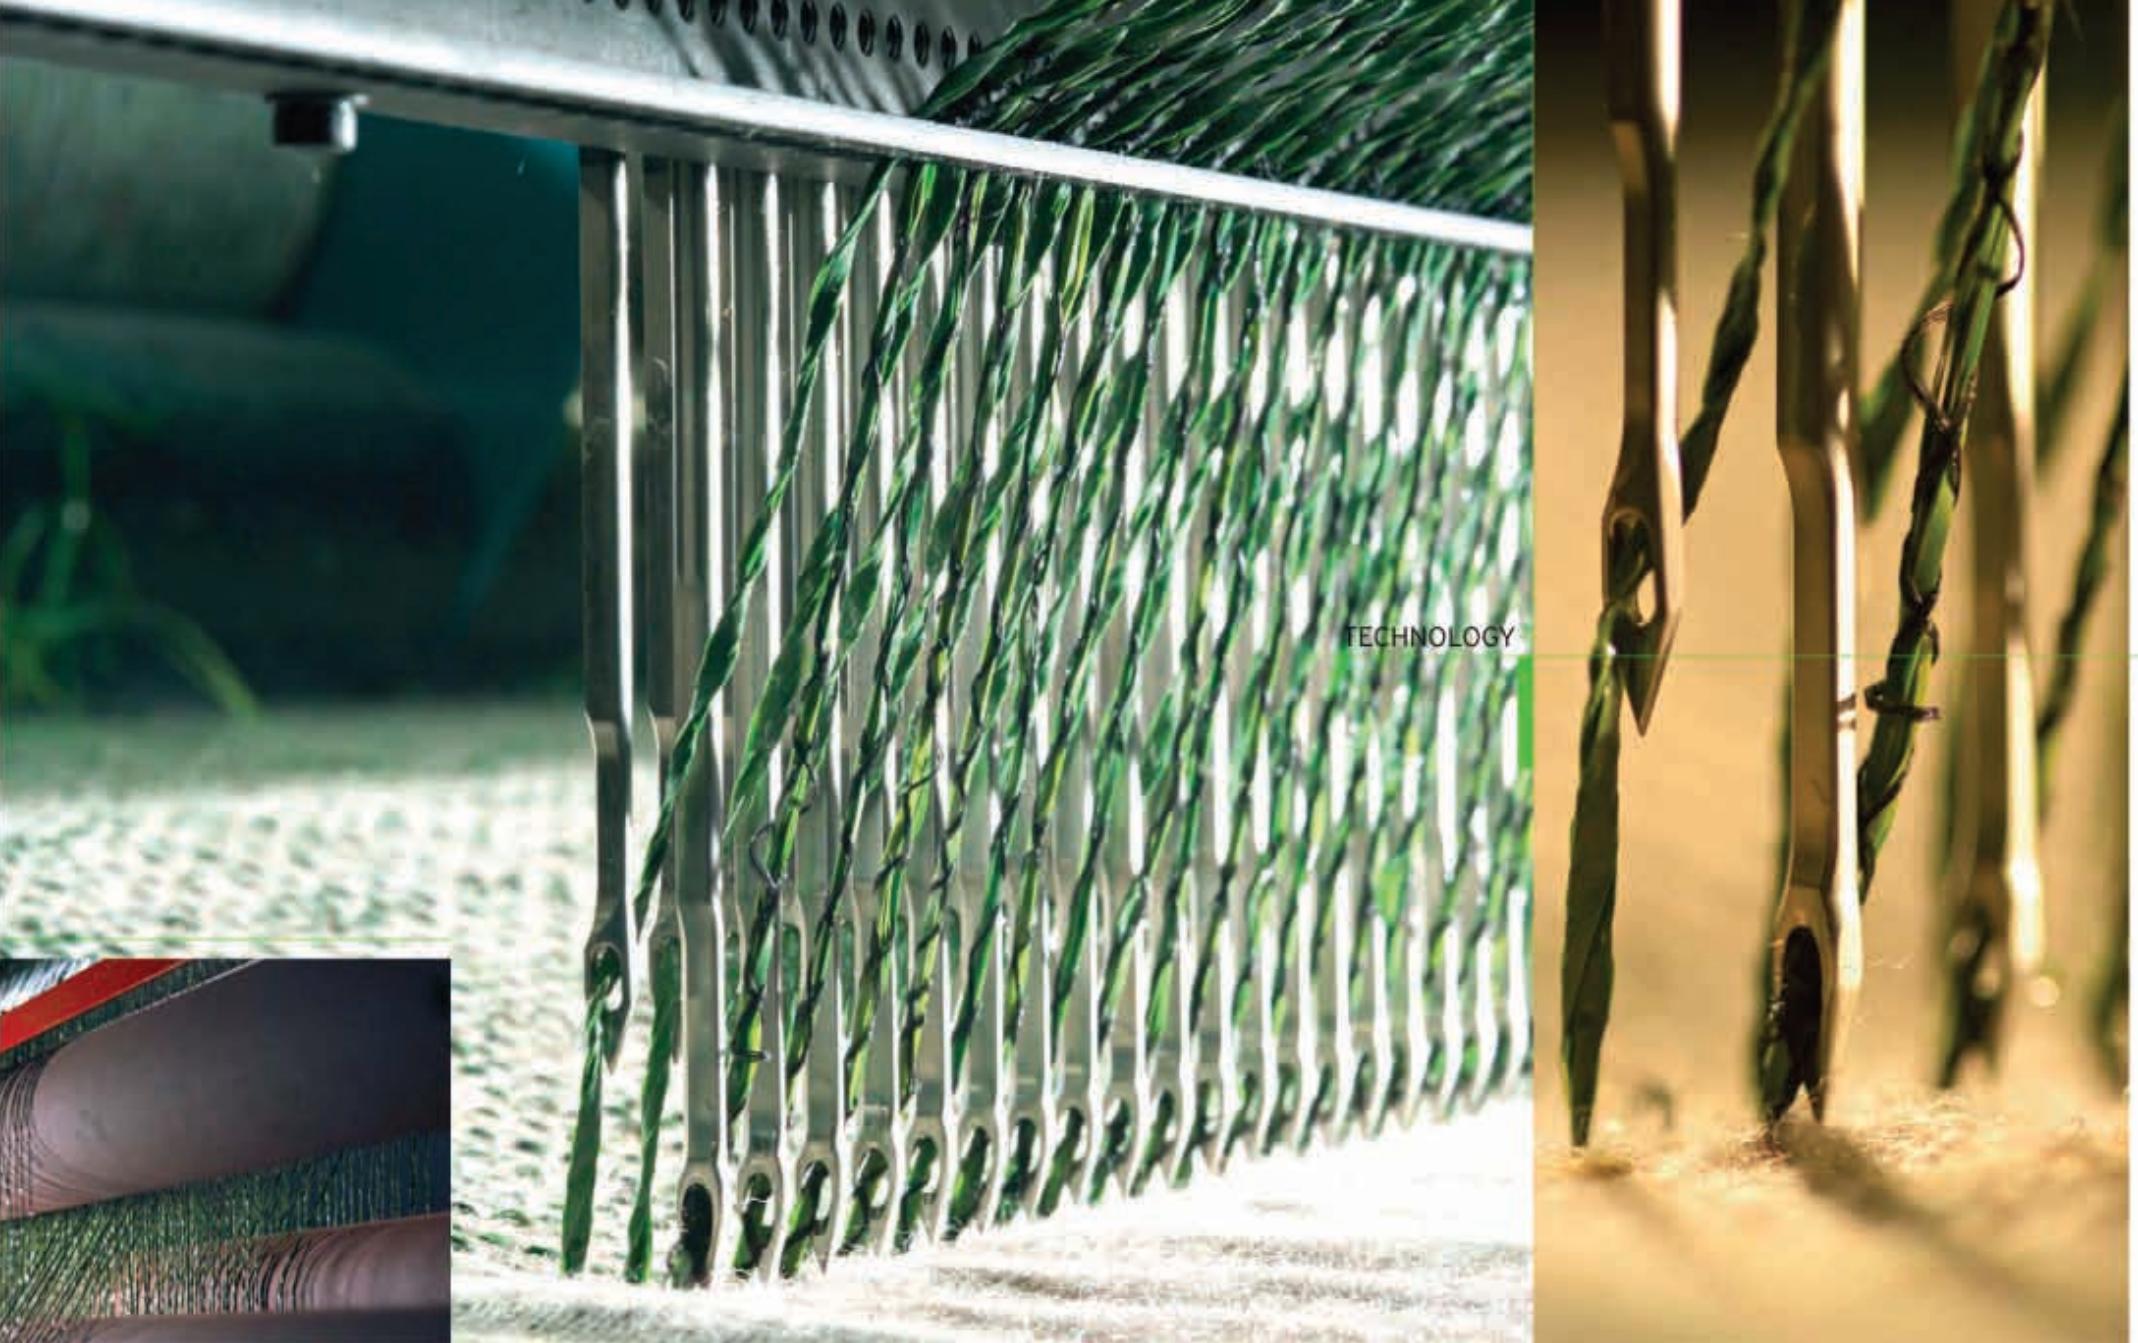

Double turf, unique technology

DOUBLET® n'est pas seulement un système de double filament croisé, mais une vraie innovation de **Italgreen**, 2 fibres à deux hauteurs différentes, seul **Italgreen** en 20 ans d'expérience en gazon synthétique a développé cette solution unique.

DoubleT® is not only an innovative double turf system but also and mainly an Italgreen patented technology. Two different yarns tufted at two different heights: only Italgreen, for more than 20 years experienced in manufacturing synthetic grass, could develop a worldwide unparalleled solution
